ABOUT

I am a Computer Science student with a basic to intermediate understanding of frontend development technologies like HTML, CSS, JavaScript, and Bootstrap. I have created a few simple projects to apply what I've learned and am currently exploring ReactJS. I enjoy building clean and responsive user interfaces and continuously try to improve my skills through self-learning and online courses. As a fresher, I am looking forward to joining a team where I can gain practical experience and grow as a frontend developer.
